TABLE OF CONTENTS

	<u>Page</u>
1. Introduction-----	1
2. Temperature Meter-----	2
2.1 Temperature Circuit Operation-----	2
resistor-thermistor network-----	2
precision bridge network-----	2
analog-to-digital converter-----	3
2.2 Calibration-----	3
3. PH Meter-----	4
3.1 PH Circuit Operation-----	4
power supply-----	4
pH signal amplifier-----	5
alarm circuits-----	5
4. Temperature Regulator-----	6
4.1 Regulator Circuit Operation-----	6
5. Conclusion-----	7
Bibliography-----	8
Appendix A - The Proposal-----	9
Appendix B - Thermistor Data Sheet-----	10
Appendix C - Analysis of Bridge Network-----	11
Appendix D - Diagram of Temperature Circuit-----	12
Appendix E - Diagram of PH Circuit-----	13
Appendix F - Analysis of Temperature Regulator-----	14

LIST OF ILLUSTRATIONS

Figure

1. Block Diagram of Temperature Measuring Circuit
2. Resistor - Thermistor Network for the Temperature Bridge
3. Bridge Network for the Temperature Measuring Circuit
4. Block Diagram of PH Measuring System
5. Power Supply for PH Measuring System & Temperature Regulator
6. PH Signal Amplifier
7. Alarm Circuit Diagram
8. Complete Circuit Diagram of Temperature Regulator

ABSTRACT
OF
COMPLETION REPORT OF THE SPA
MONITORING AND REGULATING SYSTEM.

BY

Robert F. Waggoner

The system is now operational and is being packaged. The system is being developed to overcome the problem of no monitoring and poor regulation of water temperature along with the inconvenient method of pH monitoring. Under the current system optimum water temperature is only achieved once a day and water pH levels are continuously neglected posing a health risk.

This report contains technical data on the digital temperature meter, pH measuring circuit, and the temperature regulator. All three circuits are illustrated and their operation explained. Calculations and manufacturers data sheets are in the appendixes.
